

Weilbach AtoBViaC

The trusted standard for voyage distance calculations

Why accurate distances matter

- Commercial negotiations depend on trusted voyage distances
- Bunker calculations are only as accurate as the mileage behind them
- ECA routing changes voyage economics
- Piracy avoidance routes must be accounted for from the outset

Weilbach AtoBviaC delivers the above, plus more.

Why AtoBviaC remains the industry standard:

Global coverage – more than 16 million pre-calculated voyage legs connecting over 7,000 ports worldwide

Fits your workflow – available online, offline or as an API for seamless workflows

ECA-zones – Emissions Compliance Zone distances calculated and presented separately

Trusted throughout the industry – used by Worldscale as the benchmark for tanker rate calculations

Built by experts – every voyage leg is created and verified by Master Mariners

Point-to-point – distance calculations can be port-to-port and point-to-point

| 16 million+ voyage legs | Every route verified by a Master Mariner | Updated with ADMIRALTY Notices |
