

Weilbach Viewer

One platform. Every navigation task

The challenges with traditional navigation

- Navigation tasks are spread across multiple systems
- Coordinating BoB tasks using unconnected sources is time-consuming
- Time-consuming to download, compare, calculate, update files from multiple sources
- Route changes can trigger urgent chart ordering

Weilbach Viewer eliminates these issues.

Viewer gives vessel and shore one integrated platform for navigation and planning:

Plan better voyages – generate safe, compliant routes in minutes from an extensive worldwide database

Complete ENC management – view, update and order ADP, AENP and AVCS charts from one place

Ready for ECDIS – export routes and chart data directly, with routes generated on demand

Vessel company portal – fleet monitoring of vessel holdings, order management and spending

Extend your capabilities – add weather forecasting, NAVAREA Warnings, environmental overlays and more

Import NMEA data for emergency navigation – back-up to ECDIS breakdown

| S-100 and ADSD-ready | PAYS users get full Viewer functionality |

Viewer standard license

- View, update and order
- ADP, AENP & AVCS charts
- Passage planning document
